

"There is a wonderful quality of depth, color, and mystery in many of the art pieces in this exhibition. This is a fresh look into the world of particle physics as art. I found this quite compelling as the existence of neutrinos and many forms of shadowy matter are so complex and profound that this confirms the oddly inverted view that science has now led us to a realm of magic."

Gonzo Berto
New Art Examiner

Sneak peak at Gonzo Berto's review in the January 2017 issue of the *New Art Examiner* of Ellen Sandor and (art)ⁿ's ground breaking new art exhibit, "Neutrino's in a New Light" in the art gallery at Fermi National Accelerator Laboratory (particle accelerator) in Batavia, IL. The exhibit opened December 3, 2016 and is on public display until March 17, 2017.
